CONTENTS

Chapter Name — Page

1. **LIMIT AND CONTINUITY** 1
   - 1.1 Introduction 1
   - 1.2 Graph of a function 1
   - 1.3 Limit of a function 2
   - 1.4 One sided limits 2
   - 1.5 Limit at infinity and infinite limit
   - 1.6 Uniqueness of limit 4
   - 1.7 Algebra of limit of functions 4
   - 1.8 Continuity 14
   - 1.9 Discontinuity 16
   - 1.10 Type of discontinuity 16
   - 1.11 For functional limits 18
   - 1.12 Theorems on continuity 25
   - 1.13 Uniform continuity 30

2. **SUCCESSIVE DIFFERENTIATIONS** 37
   - 2.1 Introduction 37
   - 2.2 *n*th differentiation of some standard function 38
   - 2.3 Use of partial fraction 42
   - 2.4 Leibitz's theorem 47
   - 2.5 Determination of the value of *n*th derivative of a function at X = 0 54

3. **PARTIAL DIFFERENTIATION** 61
   - 3.1 Introduction 61
   - 3.2 Results of partial differentiation 62
   - 3.3 Partial Derivatives of the higher order 62
   - 3.4 Homogeneous function 70
   - 3.5 Total differential 78
   - 3.6 Implicit relation of x and y 78
   - 3.7 Differentiation of implicit functions 79

4. **TANGENT AND NORMAL** 85
   - 4.1 Introduction 85
   - 4.2 Polar co-ordinates 89
   - 4.3 Angle between radius vector and tangent 89

4.4 Angle of intersection of two curves 90
4.5 Length of subtangent and subnormal 90
4.6 Length of the perpendicular from pole to the tangent 90
4.7 The pedal equation 91
4.8 Differential coefficient of arc length (Cartesian form) 92
4.9 Differential coefficient of arc length (polar form) 92

5. CURVATURE 101–120
5.1 Introduction 101
5.2 Curvature 101
5.3 Formula for radius of curvature (Cartiesian form) 102
5.4 Radius of curvature at the origin 102
5.5 Radius of curvature for pedal equations 110
5.6 Radius of curvature for tangential polar equations $\pi = f(\psi)$ 110
5.7 Radius of curvature in polar form 111
5.8 Centre of curvature 114
5.9 Coordinates of the centre of curvature 114
5.10 Choro of curvature 115
5.11 Length of the chord of curvature 115

6. ASYMPTOTES AND SINGULAR POINTS 121–152
6.1 Introduction 121
6.2 Determination of asymptotes 121
6.3 Asymptotes of general equation 122
6.4 existence of asymptotes 123
6.5 Determination of c corresponding to some identical values of m 123
6.6 Number of asymptotes of a curve 124
6.7 Asymptotes parallel to coordinates axes 124
6.8 Other methods for finding the asymptote of an algebraic curve 129
6.9 Asymptotes by expansion 131
6.10 Intersection of a curve with its asymptotes 134
6.11 Asymptotes of non-algebraic curves 137
6.12 Asymptotes of polar curves 137
6.13 Concave and convex curves 141
6.14 Point of invlexion 141
6.15 Determination of the points of inflexion 141
6.16 Multiple and signular points 144
6.17 Species of cusp 145

6.18 Position and nature of double points 145
6.19 Nature of a cusp at the origin 147
6.20 Nature of a cusp at any point 147

7. DIFFERENTIABILITY 153–19

7.1 Introduction 153
7.2 Derivative of a function 153
7.3 Continuity and differentiability 154
7.4 Algebra of derivatives 155
7.5 Roller's theorem 171
7.6 Lagrange's mean value theorem 173
7.7 Cauchy's means value theorem 174

8. DIFFERENTIABILITY 191–21

8.1 Introduction 191
8.2 Taylor's theorem 191
8.3 Maclaurin's theorem 193
8.4 Failure of taylor's and maclaburin's theorem 194
8.5 Power series expansions of some standard functions 194
8.6 Some more expansions 201
